

PRIVATE AIRCRAFT CHARTER

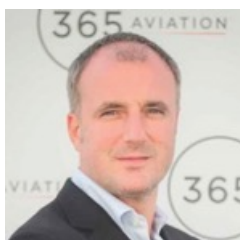

ABOUT US

Based in the City of London, 365 Aviation is an independent Boutique Private Jet Charter company. We have access to over 4,000 commercially registered aircraft, working closely with operators worldwide.

Our Team of Charter Brokers have over 40 years of collective aviation knowledge. Our passion for outstanding service is what sets 365 Aviation apart from our competitors.

WE ENSURE YOU FLY SAFELY AND THAT EVERY ASPECT OF
YOUR FLIGHT IS METICULOUSLY PLANNED AND EXECUTED

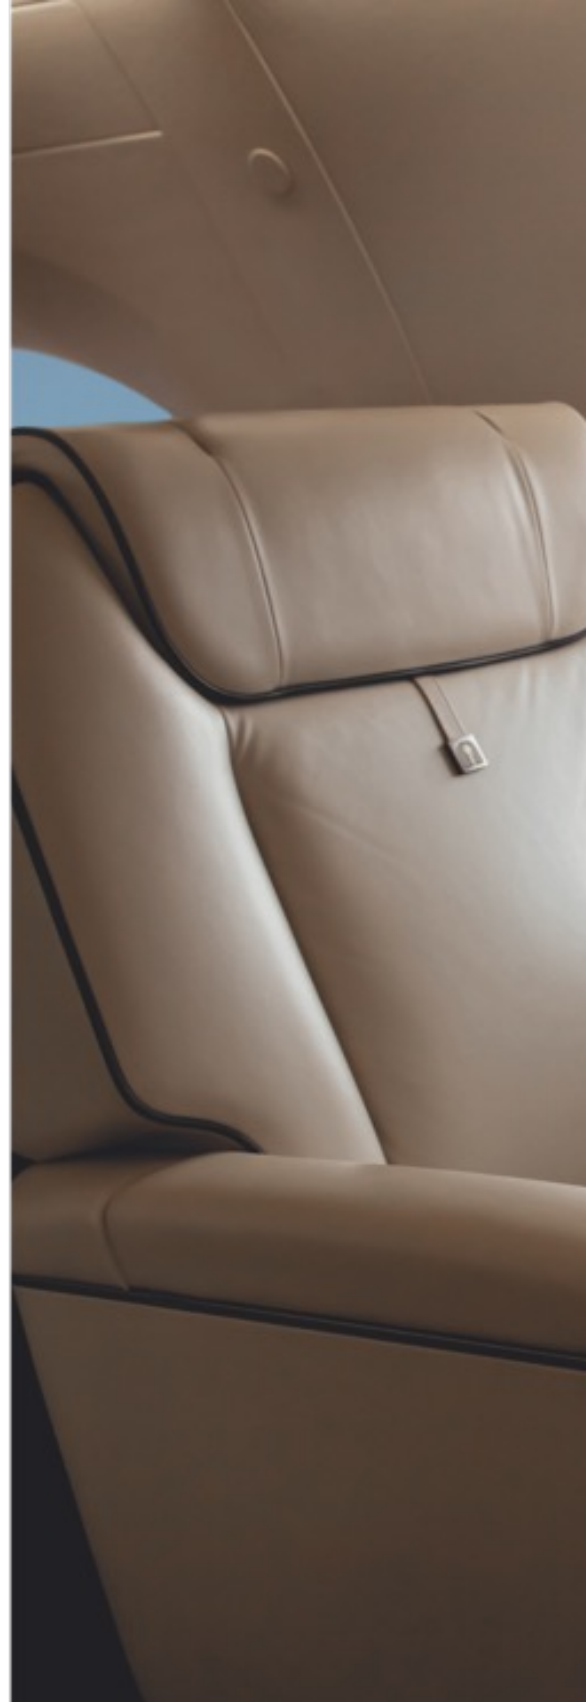

YOUR JOURNEY STARTS HERE

WHY CHARTER?

Whether travelling for business or pleasure, chartering a private jet has numerous advantages. Firstly, from a pleasure perspective, you travel on your terms. To the jet set hot spots or to private islands all at times that suit you. Everything you could wish for will be catered to. Your favourite magazine, food and drink the later could even be sourced from your favourite restaurant or delicatessen. Your journey should be a pleasure, an extension of your own home.

When it comes to chartering a private jet for business purposes, the benefits of being able to avoid long delays and unnecessary waiting times are paramount for those on a tight working schedule, with little time to spare. We often have clients hold their board meetings on flights, which can improve the efficiency of their day enormously. The flexibility of choosing your own schedule allows for multiple trips to be made in one day, which is not possible when flying commercially. This may mean your day can start with a meeting in the City at 8am, on to Frankfurt for a meeting at 1.30pm, followed by an evening event in Madrid.

We recently commissioned a piece of independent research that explored the lost time spent travelling to, from, and within airports. The research partner, Censuswide, polled more than 2,000 HNW individuals and found that, on average, travellers spend over three and a half hours in airports pre- and post-flight. Add on the average time travelling to and from the airport (2.76 hours) and that's a staggering 6.3 hours of wasted time per trip. And that's before the flight itself, let alone any delays. The average C-Suite Executive's hourly pay is up to £1,000, so when one considers lost productivity, suddenly the advantages of private aviation speak for themselves and private jet travel doesn't seem like an extravagance at all, more like efficient planning.

OUR TEAM WILL ENSURE THAT THE OPTIMAL AIRCRAFT
IS SELECTED TO SUIT YOUR BESPOKE REQUIRMENTS
