FOKKER 50

This twin turboprop-powered airliner with 50 seats proves to be very popular with small shuttle airline companies. The Fokker F-50 is based on the fuselage of the F-27 Friendship. The improvements were the new Pratt and Whitney Canada PW125 turboprops, driving six blades propellers. This allowed faster speeds with greater fuel economy, bringing new avionics and an EFIS glass cockpit.

Overall cabin length:	**15.96m / 52.3 ft**
Cabin height:	**1.96m / 6ft 5 in**
Cabin width:	**2.5m / 8 ft 2 in**
Luggage Volume:	**290 cu.ft**
Passenger capacity:	**58**
Maximum range (distance):	**2 hours**
